

An award-winning and innovative solution for the animal husbandry industry.

NEW reinforced design with high grip edging and eight year warranty. The award-winning EASYFIX Slat Rubber System has been designed to increase the comfort of the animal, the well-being and the performance of cattle housed on concrete grids.

The rubber carpets for grids are designed according to measurement to be adapted to all types of grid. When the carpets are fixed to the grids, the perforated space is only 14% smaller compared with competing products which reduce the space by 20-25%.

This patented product offers a simple installation using rubber grips and it is made of a compound of natural rubber of the highest quality. Our rubber covering for grids has been designed for old and new concrete grids.

ADVANTAGES	CHARACTERISTICS
<ul style="list-style-type: none"> • It increases the comfort and well-being of the cow • It reduces lameness. • The sloping shape allows the fast run off of urine to improve drainage to have livestock that is always cleaner and at the same time reduce the emissions of ammonia. • It increases productivity - average daily increase in weight of the livestock • Better conversion of the ration. 	<ul style="list-style-type: none"> • New reinforced design. • High-grip shape. • Approved by the DLG Signum Test. • Patented double rubber band system. • Adapted to new and used concrete grids. • Designed for grids of all sizes. • Sloping shape for the fast run off of urine to improve the drainage and at the same time reduce the emissions. • Built-in grip solution (no additional fixing material is required). • No perforation of the grid.
GUARANTEE	
8 years.	

* Note: All the dimensions offered are subject to rubber manufacturing tolerances

WHAT DO OUR CUSTOMERS HAVE TO SAY

"We have bought EASYFIX Slat Rubber and it has been a great investment. The carpets have really transformed our system. The company installed them and they have been a fantastic investment. The rates of growth have increased between a quarter and a third per kilogramme a day and personally I put it down to the increased comfort."

Adam Quinney,
Cattle breeder in the U.K.

"I have noted that the cattle spend more time lying down, the problems with hooves and lameness are the problems of the past and the rates of growth have improved significantly."

Chris Bourns, Irish breeder of beef cattle, Co. Galway

He produces 1,400 head of cattle a year on EASYFIX Slat Rubber.
