

Jupiter S is a new 60 mm mattress for cows with a unique and innovative design.

The design includes a built in panel and a cushion on the two sides of the mattress.

This unique characteristic is a world first and guarantees an excellent position of the cow when it lies down in the cubicle. The mattress has a padded upper surface that avoids injuring the knees and lesions to the legs.

An edging nailed at the bottom guarantees the cow the maximum comfort with a yield of up to 22.7 mm. The rear part of the mattress has non-abrasive sloping edging that favours the run off of effluent into the aisle.

ADVANTAGES	CHARACTERISTICS
<ul style="list-style-type: none"> • It fosters the comfortable position of the cows in the cubicle. • The cows can stretch out the lower limbs in maximum comfort. • It increases the comfort, well-being and hygiene of the cow. • It increases productivity - milk production. • Suitable for D.I.Y. type installation and all cubicle measurements. 	<ul style="list-style-type: none"> • Natural rubber compound. • The hidden blocking system creates a finish without stitching. • An edging nailed on the lower side with a yield of up to 22.7 mm. • Non-abrasive edging towards the rear side. • Spacers are available to regulate the width.
DIMENSIONS	GUARANTEE
1200mm (width) x 1930mm (length) x 60-100mm (d) Weight: 76 kg.	10 years.

*Note: All the dimensions offered are subject to rubber manufacturing tolerances.

Jupiter F is a new 60 mm mattress for cows with a unique and innovative design.

The design includes a built in panel in front and a cushion on the two sides of the mattress. This unique characteristic is a world record and guarantees an excellent position of the cow when it lies down in the cubicle.

The mattress has a 45 mm layer of polyurethane latex foam that creates an upper layer padded for maximum comfort. The rear part of the mattress has an inclined edging that favours the run off of effluent into the aisle. The mattress has been designed with a hidden blocking system that creates a finish that is without stitching.

ADVANTAGES	CHARACTERISTICS
<ul style="list-style-type: none"> • It fosters a comfortable position of the cows in the cubicle. • The cows can stretch out their lower limbs in maximum comfort. • It increases the comfort, well-being and hygiene of the cow. • It increases productivity - milk production. • Suitable for D.I.Y. type installation and all cubicle measurements. 	<ul style="list-style-type: none"> • Natural rubber compound. • 45 mm mattress - 50% foam and 50% polyurethane, • Mattress enclosed in a 500 micron sealed casing. • Non-abrasive edging towards the rear side. • The hidden blocking system creates a finish without stitching. • Spacers are available to regulate the width.
DIMENSIONS	GUARANTEE
1200mm (width) x 1930mm (length) x 60-100 mm (d) Weight: 76 kg.	10 years.
